

## WINDOWS MEDIA PLAYER INSTALLATION INSTRUCTIONS

To download Windows Media Player for a PC, go to the [download site](#) and follow these steps:

1. Select the versions from the drop-down boxes that correspond to your operating system.
2. Select the language version from the drop-down box.
3. Click on the **Download Now** button. Note: **Do not** select any version labeled **BETA**.
4. In the **File Download** dialog box, select **Save this program to disk**, and then click **OK**.
5. In the **Save As** window, save the file to your desktop. Do not change the name of the file.
6. Click the **Save** button.
7. Depending on your modem speed, the download time may vary. Take note of the file name as you will need to reference the file once download is complete.

Once the download is complete, you are ready to install the player. Close all applications before proceeding with the player installation.

1. Locate the file on your desktop and double-click it to activate the installation.
2. When the security warning appears, click **Yes** to continue installation.
3. The program will display an End User License Agreement. Click **Yes** if you agree to comply.
4. After installing the initial program files, specify your Internet connection speed. Choose between 14.4K, 19.2K, 28.8K, 56K Modem/ISDN, 112K Modem/Dual-ISDN, T1/Lan, or Unknown/Other. If you do not know your connection speed, ask your network administrator or refer to your modem documentation.
5. Click **OK**.
